

Live Streaming for Houses of Worship

Most religious organizations hold events/services weekly at a minimum. Using technology to deliver religious services to people who cannot attend in person is a great solution to reach your congregation. Live Streaming will allow you to bring your community together in almost Real Time! Websites are the most popular livestreaming destination for Houses of Worship. Social Media and Mobile Apps are also being used across the country.

Key Factors That Are Essential For Successful Live Streaming:

- Finding the right equipment
 - Reliable internet
 - Power for the equipment
- Good quality audio miked so the audio is clear and professional sounding
- Good quality video cameras for brilliant HD video recording and streaming
 - Space to locate your master control

The professionals at Paladin have the experience and training to assist you with all your needs for Live Streaming video. Our team has helped Houses of Worship across the area launch new Audio/Video Systems as well as upgrade their older existing equipment to new state of the art technology. Our team can install professional PTZ Cameras that will provide fantastic high definition footage with built in Live Streaming capabilities for your worship services.
